## Customer Reviews

I purchased this textbook for my Master's course. I found this book to be very informative about diagnosing children with disabilities at a young age and was very informative of the laws. 's textbook prices are much cheaper than the college book store. 's textbook buy back policy is remarkable. This is a great way to save money. You go online and request to send this textbook back. will pay the shipping and sends you an gift card for the buy back amount. When all was said and done, I paid \$20 for this textbook. I highly recommend purchasing textbooks from .

This text is a great resource for students in an introductory course on supporting children with disabilities. Covers everything from summaries of types of disabilities to supporting children's families.

The purchasing process went very smoothly, there were no problems with delivery. I used the book in school. The book is very informative and easy to read.

Love loose leaf books so much more than hard back! Easier to grab a chapter and go study rather than hauling around a huge book all the time.

Received via Kindle as a rental. I was immediately able to access and also received a reminder that the rental was ending 2 weeks before.

Even the teacher in my class didn't use this book much. It was good for some informational use, but not most of our course study.

Chock full of information and easy-to-read format. The vignette's are well chosen and are great examples in action.
